Communicate Better
WITH SOFTPHONE

COUNTERPATH

Making your office
accessible
anywhere, anytime.

Introduction

Introducing BRIA SoftPhone Client

Bria 4 is a carrier-grade next generation SIP softphone client that enables you to manage your communications easily and efficiently – all from your computer desktop.

As a Mac or Windows PC phone replacing or complementing your hard phone, Bria allows you to make VoIP and Video calls over IP, see when your contacts are available, send Instant Messages and transfer files with ease and efficiency.

NEW! The latest release of Bria, Bria 4.1, also includes a multiple license key capability that enables retail customers to further enhance their communications experience with optional add-ins and services like Screen Share and an Add-In for Outlook®. For more details on available add-ins, visit the Add-Ins and Branded Features tab.

Built on SIP and open standards, Bria is proven interoperable with many of the industry's standard platforms and devices. It also includes features specifically designed for business and enterprise users and can be deployed within an enterprise environment either by manual configuration via the softphone Graphical User Interface (GUI) or by using the provisioning module of CounterPath's Stretto Platform™.

NOTE: With the release of Bria 4, CounterPath has discontinued support for Windows XP. If you are using Windows XP with Bria 3.5.5 or earlier, your client will continue to work, however you cannot upgrade to Bria 4 without first updating your Window's operating system to Windows Vista, 7, 8 or 8.1. To purchase Bria 3.5 for Windows XP, please click hereto continue to the product page.

Bria for Desktop features

- Available for Mac and Windows, Bria is a highly interoperable desktop softphone that enables voice and HD video calls over IP, as well as Instant Messaging and presence management.
- Multiple account integration including local or company directories, Microsoft
- Outlook®, XMPP, XCap or WebDav servers
- Intuitive contact-centric user interface provides more ways to make, receive and
- manage calls and IMs
- Make voice and video conference calls
- Instant messaging and presence with support for SIP SIMPLE and XMPP
- Workgroup capabilities - Busy Lamp Field (BLF) and Bridge Line Appearance (BLA)
- Company chat rooms - for online conferences and meetings.

Bria for Mobile / Tablets features

There are applications available for wide range of popular smartphones and tablets including iOS, Android and BlackBerry 10 devices. Bria mobile clients are fully interoperable with Bria for desktop and contain many of the same features for voice and video calling*, as well as messaging, presence and advanced audio codecs*.

- Seamless integration with CounterPath's desktop softphones
- One-touch access to dial pad, contacts, call history and more, based on the device's native design
- Intuitive in-call management options such as add call, mute, hold and speakerphone
- Multiple call support with ability to split, merge and transfer calls
- Multitasking support for background operation while using other applications on your device
- HD audio codecs including G.722, SILK and Opus
- Advanced security and encryption with TLS and SRTP

* Not all features available on Bria StrettoTM for BlackBerry at this time.

Get Softphone

Ready to take
your business
to the next level?

Integrate MS Teams with your IP Telecom Hosted PBX in a few easy steps:

STEP 1. Qualify

Teams is a game changer for any business.

However, there are a few things you'll need to be ready to integrate.

Hosted PBX: Teams is an add-on for IP Telecom's Hosted PBX phone systems.

Find out how you can get Hosted PBX for your business.

Office 365: Teams requires an E1, E3 or E5 level subscription. Don't have it?

We can help you upgrade.

DNS Access: To implement, we will also need access to your DNS. If you're not sure if you have access, we can find out for you.
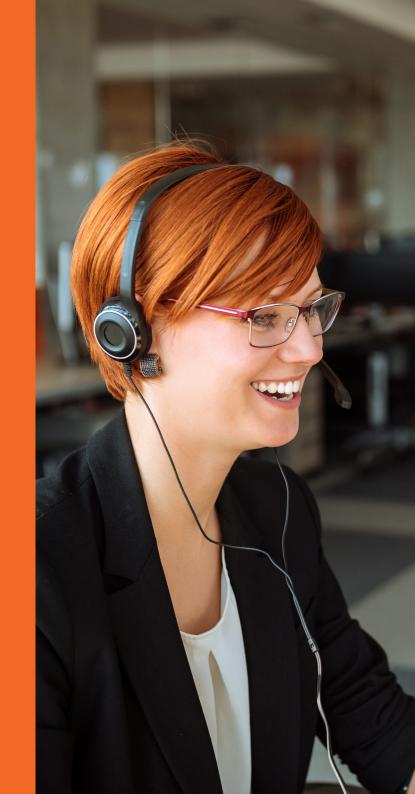

STEP 2. Integrate

IP Telecom's Telecom for Teams is quick and seamless.

Once you've scheduled your installation, our team of experts will have it up and running in a matter of hours *with zero downtime.*

STEP 3. Benefit

With **no training required**, Telecom for Teams saves you time and money from the first day.

IP Telecom offers ongoing support and unparalleled customer service for when questions do arise, IP Telecom-trained engineers are always here to help.

Don't wait to get ahead of the competition!
